

BUILDING PRODUCTS

SUPPORTING A STRONG, SAFE BUILT ENVIRONMENT

Our communities and our lives revolve around the buildings we occupy – everything from homes, offices and schools to restaurants, retail stores and entertainment venues. We want our buildings to be beautiful and welcoming, but they need to be safe, strong, and sustainable – which is why the products used to create our built environment must meet specific compliance requirements.

That's where we come in. Our *Marks You Can Build On* are backed by more than 85 years of experience and industry leadership in certification, inspection, and testing. PFS TECO provides the full range of services required to bring a wide variety of building products to market. Demonstrating standards compliance is essential, and a PFS TECO approval accomplishes that goal with a name and marks trusted by manufacturers, building professionals, and code officials.

COMPLIANCE SUPPORT THROUGH:

- Quality assurance leadership
- Product standards education
- Formaldehyde emissions testing
- Structural performance testing
- Industry-accepted Evaluation Reports
- Client-tailored guidance and assistance
- Exceptional customer service
